

Applicant again thanks the Examiner for the indication of allowability. Following submission of the previous response, Applicant explained that the voltage supply provides a 60-70V output voltage at a 10-40V input voltage. So FIG. 1 was originally correct, but the translation was a little off. Applicant has corrected the portions of the application affected, thus placing the case in condition for allowance.

In view of the foregoing amendments and remarks, the subject application is believed to be in condition for allowance. Therefore, further consideration and allowance of the subject application is requested. If the Examiner considers personal contact advantageous to the disposition of this case, please call Applicant's Attorney, David E. Henn at (585) 325-4618, Shlesinger & Fitzsimmons, Rochester, New York 14604, or fax him at (585) 232-5997.

Respectfully submitted,

A handwritten signature in dark ink, appearing to read 'D. Henn', is written over a horizontal line.

David E. Henn
